## SUMMARY

---

A junior software engineer with a passion for developing innovative programs that expedite the efficiency and effectiveness of organizational success. Well-versed in technology and writing code to create systems that are reliable and user-friendly. A skilled programmer who has the proven ability to motivate, educate, and manage a team of programmers to build software programs and effectively track changes. Confident communicator, strategic thinker, and innovative creator to develop software that is customized to meet a company's organizational needs, highlight their core competencies, and further their success.

## EXPERIENCE

---

02/2022 - Present

### Full Stack Developer

WePrepFBA

- Working as a full-stack software engineer at WePrepFBA building a warehouse management system.
- The WMS is a package management system that tracks the inventory of the warehouse.
- Built applications using the Django python framework using CRUD based operations.
- Designing the application from scratch with my team and covering the assessed requirements.
- Designed a front-end UI that's utilised admin panel based features and more.
- Improved warehouse productivity by 25% and cut expenses saving them £10,000 a year.
- Managing timeline restrictions to build the product by the 1st of July 2022.

02/2022 - Present
